Town Board Report for 06/15/2020

- 1. Hillside/East St. drainage project is complete. I have a work file of the project with photos before, during, and after if anyone would like to see it. Other than weather delays everything went smoothly and the final product looks good and should definitely be beneficial to the residents in that neighborhood. The bill from Arexco was for \$31,500 and has been turned in to Cheryl as it was already town board approved some time ago.***
- 2. I recently completed an online class offered free of charge through IN LTAP. This class was titled "Maintaining a safer roadway". Lots of good information was provided and gathered.***
- 3. One of our garage doors broke the overhead tension spring. I had OverHead door company come and make the repairs as they were the original installers when the garage was built. I have yet to receive a bill for the repairs however they quoted it to be in the \$600 to \$700 range.***
- 4. (Parks & Rec) we recently had to replace two broken swings in Coopers park, I did find heavy duty commercial style swings at WalMart.com, I ordered 4 (2 spares) at a total cost of \$147.96.***

We had to replace the plastic trashcan liners in all 6 receptacles in the park.

At the request of the Parks Dept, we cut and removed the Soft Maple tree starts growing out of the pine trees by the MyPath shelter house.

- 5. Lastly, I will be out of town on family vacation for two weeks June 22nd to July 4th. Assistant Superintendent Roger Freeman will be running the Department in my absence.***

***Thank you,
Tony Floyd***
